

Teen Tech Event at KC Stadium,
Hull

Type of CSR Activity

Community

Organisation Involved

Beverley Girls School
The Humber Education Business Partnership (EBP)

The Humber Education Business Partnership (EBP) has been chosen as one of the first two areas in the UK to run the award winning TeenTech event.

The event was held at KC Stadium on 14 July 2011 where 300 students aged 12-13 had the opportunity to try their hand at experiments, handle leading edge technology and, most importantly, to meet the engineers, technicians and scientists behind their 21st century lives.

TeenTech shows young teenagers how their love for mobile phones and computer games could act as a gateway to a rewarding career developing in the next generation of must have gadgets. Even more importantly, this age group is extremely environmentally aware and TeenTech shows them the role science in helping the environment.

Over 30 Local and National Employers in Science, Engineering and Technology provided intriguing and practical encounters. The event allowed students to be inspired by 'real' engineers and have the chance to find out what's really involved in their work and how important certain subjects like Maths and Physics can be for future careers.

Caddick Construction contributed to the event, providing a group of students from Beverley Girls School with the help and guidance to create an application for the i-phone.

"On behalf of the Humber EBP team I would like to thank you for your support at the Humber TeenTech event.

The day was a huge success."

Tina Jenkins
