Organisation Involved
 Temple Moor High School
 EDT - Go4 Set

In 2010 and 2011 Caddick Construction were involved with Temple Moor High School with the Go4Set initiative which is an environmentally themed ten week science, engineering and technology project set up by the charity EDT.

As part of the process, Caddick Construction mentored students at Temple Moor High School to undertake the project. In 2010 the project theme was 'Energy Conservation' and in 2011 'Energy in our School'.

"We were paired with Caddick Construction by Go4Set in 2010. Everyone at Caddick, especially Chris Weathers and Chris de Whytell were so helpful, supportive and committed that we begged to collaborate again in 2011.

The guidance they provided our students and the tireless enthusiasm they demonstrated was a gift to me and a huge inspiration to the students involved.

The boys particularly enjoyed the visits to Headingley Stadium and Elland Road; a highlight for staff as well."

Steve Murray
Programme Leader for Science
Temple Moor High School

The projects enabled students to apply scientific, technological and engineering and mathematical knowledge in a real-life setting.

Each school's project was judged and Temple Moor along with Caddick Construction came second in 2010 and won in 2011.
